Handling information and content

The skills required to find, manage and store digital information and content securely.

I can:

1) understand that not all online information and content that I see is reliable ☐
(e.g. understand that not all entries in online encyclopaedias, such as Wikipedia, are true or reliable)

2) evaluate what information or content may, or may not, be reliable ☐

3) use search engines to find information and use search terms to generate better results ☐
(e.g. search for news using a browser such as Chrome, Internet Explorer or Safari)

4) use bookmarks to save and retrieve information on my web browser ☐

5) access information and content from different devices ☐
(e.g. send photographs and other documents to friends and family as an email attachment)

6) understand that the cloud is a way I can store information and content in a remote location ☐

7) organise my information and content using files and folders on my device or on the cloud ☐
(e.g. use a cloud storage account for a music or photo collection (from legal sources such as Apple iCloud, Instagram) and access the collections from different devices)

8) use the internet to legally access entertainment including films, music, games and books ☐
(e.g. stream music from legal sites such as Spotify or Apple Music, or watch streamed movies from legal sources such as Netflix or Amazon Prime)
